

MINUTES

NON-LEGISLATIVE MEETING – OCTOBER 5, 2016

The October 5, 2016 Non-Legislative Meeting of the Lower Swatara Township Board of Commissioners was called to order at 7:00 P.M. by President Thomas L. Mehaffie III. President Mehaffie called for the pledge of allegiance and a moment of silence.

Roll call was taken with the following officials in attendance:

- Thomas L. Mehaffie III, President
- Jon G. Wilt, Vice President
- Michael J. Davies, Commissioner
- Laddie J. Springer, Assistant Secretary
- Todd F. Truntz, Commissioner
- Frank E. Williamson, Jr., Public Safety Director/Assistant Manager
- Jean R. Arroyo, Secretary
- Peter R. Henninger, Solicitor
- Erin G. Letavic, HRG, Engineer
- Robert S. Greene, Planning and Zoning Coordinator
- Daniel L. Wagner, Public Works Director

Residents and visitors in attendance: (PLEASE SEE ATTACHED SIGN-IN SHEET)

Solicitor Henninger reported that the Board had announced last meeting that it was convening into executive session to discuss real estate matters with regards to the Sunoco easements. He asked that the record reflect that the Board also discussed personnel matters during that executive session.

MS4 PRESENTATION: ALLISION FUNK

President Mehaffie introduced Allison Funk, MS4 Environmental Coordinator for Londonderry Township. Ms. Funk explained the goal for her position is to ensure general compliance with the MS4 permit, which is an unfunded regulated mandate through DEP and EPA. One of her first tasks was to develop a Best Management Practices' Manual for Londonderry Township so that the Township could figure out how to actually accomplish these goals. The manual includes procedures to engage the public, manage illicit discharges, inspect privately owned BMPS, and insure good housekeeping for its facilities. Ms. Funk added that she also researches and applies for grants to satisfy these requirements, trains the Londonderry

Township staff and Board members, and provides public education. All of this work has resulted in great feedback from DEP. The DEP audit in March went smoothly, and the auditor commented that Londonderry Township was one of the best municipalities he had inspected. Ms. Funk noted that this shows that the progressive approach is the way to go.

A PowerPoint of projects that Londonderry Township has participated in was presented. These projects included tree plantings along the Swatara Creek utilizing grant funding and partnering with group and volunteers from Penn State Extension, Greening the Lower Susquehanna, Chesapeake Bay Foundation, Cub Scout Pack 97, and Pennsylvania Baseball Network. Other projects done in Londonderry Township include rain gardens and rain barrels at the municipal building and a tree nursery on the Sunset Gulf course. About 100 trees are planted in the nursery, and they will need to be transplanted next year. Ms. Funk expressed hopes to partner with Lower Swatara on some sort of tree planting, whether it be on the hazard mitigation properties along the Swatara Creek or at parks which could use some additional shade trees. Londonderry Township is currently partnering with Derry Township Municipal Authority to hold a tree planting on October 22. Ms. Funk asked if the Board had any questions for her.

Commissioner Davies asked if her position is funded through a grant. Ms. Funk responded that it is not; she is paid through the general fund. Commissioner Davies also inquired if the trees for the plantings are obtained through cooperation from the County Conservation District. Ms. Funk stated that she has not personally used trees through the Conservation District; everything that was grant funded was purchased through another nursery. The trees for the buffer planting later this month are actually through a Penn State Extension grant program, and the trees themselves will be provided for this project.

President Mehaffie thanked Ms. Funk for the informative presentation.

PUBLIC COMMENTS:

Carol McQuaid, 343 Lumber Street, stated that she is here with two of her neighbors to question an article in the Press and Journal about the main sewer line being replaced up Lumber Street to service some of the new developments. The main question is whether they will have to repay to hook up to the new sewer line. President Mehaffie explained that the line known as the Highspire Interceptor is in the Borough of Highspire and will be taken care of by the Borough and the developers. Solicitor Henninger stated that he had just received an update today from

Paul Navarro who is a developer that is involved with that project. All the permits have now been obtained, and Highspire will be putting the project out to bid shortly. He explained that this will allow development of the Residential Retirement Community Plan, and should also relieve the pressure that is occurring in the bottleneck.

Ron Howard, 345 Lumber Street, asked if the existing homeowners would have to pay to hook up to the new sewer line if the Township side should need to be expanded or improved in the future. Solicitor Henninger explained they will not, since their homes are already hooked up.

Kimberly Vajda, 5 Greenfield Drive, reminded the Board that she had been at a previous meeting to express her concerns with speeding and the horrific volume of traffic on her street. She thanked Commissioner Truntz for empathizing with her when she brought up this concern. Ms. Vajda stated that the Board had indicated it would have the police monitor the street, which she has not seen. She added that the staff was also to look into whether school buses are allowed to use the road. Mr. Greene reported that after researching the plans, it was found that part of that road is in the Township, and the lower section near the school campus is private and apparently owned by the School District. The Township maintains to what was going to be a temporary cul-de-sac, which is now the entry to the soccer fields. It is basically an open street that enters into private property. Ms. Vajda suggested that if school buses are allowed to use this road, there should be signage indicating that they cannot make a left turn onto Route 441 since this is very dangerous. She anticipated that a "no left turn" sign would solve a lot of problems. She also suggested the possibility of speed humps. President Mehaffie explained that Sergeant Young had conducted some details out there, and would be able to provide her with additional information. He noted, however, that the Board will not put speed humps on a public road since they create too many problems, especially with plowing equipment. Ms. Vajda remarked that this was not well thought out for the volume of traffic on the road during eight or nine months of the year. President Mehaffie stated that if her concerns are traffic coming to or leaving from the schools, he would encourage her to attend a School Board meeting. The Township can monitor speed and will also work with the School Board. Mr. Williamson added that he may have some ideas on signage, and will make contact with Dr. Suski, Superintendent at Middletown Area School District. One idea may be to regulate the no left turn during certain period of time. This will need to be investigated since the sign would involve a Township road and a state road. Commissioner Truntz asked about previous discussions to purchase a speed sign. This would

probably be useful to set up at this particular location. President Mehaffie agreed that the Township is pursuing a grant for this purchase. Vice President Wilt suggested that Mr. Williamson move on this purchase, with or without the grant.

Charles Shrauder, 314 Lumber Street, asked if tractor trailers are allowed to use Lumber Street from Spring Garden Drive down to Highspire. Solicitor Henninger stated that he does not believe there are any weight limitations on that road, so they are permitted. Mr. Shrauder also asked if the Township could do speed detail on Lumber Street. During evening rush hour, vehicles are traveling at speeds of 50 – 60 mph. Mr. Williamson agreed to take a look at this tomorrow.

Dan Magaro, 1315 Pheasant Run Road, read aloud a letter from resident Marjie Hartz on behalf of the Concerned Citizens of Lower Swatara Township congratulating President Mehaffie on his impending election to the position of State Representative and thanking him for supporting the group. The group is asking that a very careful vetting process be used when selecting his replacement. The individual selected must have a true passion for the Township and continue with the same mindset that the present Board has to preserve the Township and not allow it to become overrun by warehouses and truck terminals. Mr. Magaro noted that he would also like to add his thanks to President Mehaffie for his tireless efforts. President Mehaffie stated that he deeply appreciates the kind words, and explained that it will be the decision of the other four Board members on who will replace him when he resigns. He expressed confidence that his fellow Commissioners will pick a good replacement with the same morals, ethics and values that he has, and that they all have. The role of Commissioner is time consuming, and the person will need to be involved wholly. President Mehaffie explained that the five Commissioners on this Board try to make the best decision for the residents and the Township as a whole, not themselves. He asked Mr. Magaro to convey his thanks to Ms. Hartz, and to assure her that the Commissioners will do their best when appointing a replacement.

FIRE DEPARTMENT REPORT:

In the absence of Chief Brown, Deputy Chief John Weikle provided the monthly report. There were 43 total calls for the month of August with 263 personnel responding which is an average of 7 personnel per event. Since February, this number is up a full person per call, so

things are moving in the right direction. Mr. Weikle added that Chief Brown will provide Mr. Williamson with the September reports prior to the next meeting.

The Department participated in the Penn State full scale exercise on September 30. The Fire Department participated in an active shooter drill and found a lot of holes in the system, which is the purpose of a drill. Most of the issues involved a lack of communication between the agencies. These are being worked on, and a follow up meeting will be held with the entities. The Fire Department also participated in the HIA full scale exercise on September 24, which simulated a plane crash.

The schedule for Fire Prevention Week and associated activities is posted on the Township website, with the Open House at the Lower Swatara Fire Station scheduled for Thursday, October 13 from 6 P.M. to 8 P.M.

Mr. Weikle reported that he had posted on the Lower Swatara residents' Facebook page a link to federal government guidelines for preparing for and surviving a hurricane, should the forecast go bad. The Fire Department will be prepared, but it is always good for the public to be prepared as well.

PLANNING AND ZONING REPORT:

Mr. Greene referenced the monthly reports on inspections and permits. The Planning Commission met on September 22 and discussed the draft ordinance to amend and supplement Section 27-2712 Zoning Hearing Board. The Planning Commission voted 4 - 0 to recommend approval to the Board of Commissioners to amend Township Ordinance #448, Chapter 27, Zoning, Part 27, Administration and Enforcement, Section 27-2712, Zoning Hearing Board, to amend the number of members on the Township Zoning Hearing Board from three to five.

The public meeting for the Comprehensive Plan was continued from the previous meeting, with opening comments and presentation of several updates and revisions that included Action Plans and Implementation Resources, Compatibility and Consistency and Plan Review, and Updates and Renewal given by Michelle Brummer. Following public input and a question and discussion period, the Planning Commission took action to recommend revising the Future Land Use Map -- William's Farm area -- by (a) changing that portion of the property on the north side of Fulling Mill Road beginning at Nissley Drive west to Longview Drive equal to the depth and in line with Hollywood Drive from Residential Agriculture (R-A) to Commercial

Neighborhood (C-N) Use (the vote was 3 yeas and 1 abstain) and (b) on the south side of Fulling Mill Road the Residential Agriculture (R-A) area between Lumber Street east to the existing Industrial Park Limited (IP-L) District, a change to Commercial Neighborhood (C-N) Use (vote was 4 – 0). There was also a motion to revise the plan to include language to encourage the Township to work with future development of the existing Commercial Highway (C-H) District in the area between Oberlin Road, Route 441 and North Union Street (vote was 4 – 0). The Planning Commission then moved to recommend approval of the Comprehensive Plan to the Board of Commissioners, subject to these changes (vote was 4 – 0). The next step is sending a letter to the adjoining municipalities and the School District and giving them the opportunity to provide input during the 45 day review period, which ends on November 18. Solicitor Henninger explained that since the Planning Commission has now recommended approval with the above referenced changes, there will be a 45 day public comment period. The plan will be posted on the Township website and interested parties can request copies. After the comment period, the plan will come to the Board for review and scheduling of a Public Hearing. President Mehaffie asked about the recommendation to include language to encourage the Township to work with future development of the existing Commercial Highway (C-H) District in the area between Oberlin Road, Route 441 and North Union Street. Solicitor Henninger explained that this is the Shope property, and the thought has been to push Spring Garden Drive through to North Union Street. Mr. Greene explained that the idea is probably to make a statement in the new plan encouraging that area for development. Commissioner Springer asked Mr. Greene to explain to the audience the difference between Commercial Neighborhood (C-N) and Residential Agriculture (R-A). Mr. Greene explained that C-N provides for uses that would generate things like restaurants, small businesses, and offices. Solicitor Henninger added that the idea is to provide smaller commercial services that would be used by the immediate residential area. R-A is the lowest density residential zone, which also permits farming uses. Vice President Wilt asked who had requested the changes on the Williams' property. Mr. Green responded that the Williams' family had asked numerous times during the steering committee's review period to consider a future land use to allow for something other than agriculture. Vice President Wilt added that they had been pushing for industrial uses during some of those meetings. Mr. Greene explained that the Planning Commission's responsibility is to look to the future and make recommendations as to how it sees the Township going. Vice President Wilt noted that he does

not see how the two-lane roads in that area could support commercial uses, especially with a school right across the street. Mr. Greene agreed that this is a valid concerns. Solicitor Henninger explained that these recommended changes are changes that the Planning Commission made to the document that came out of the steering committee.

Mr. Greene reported that the Zoning Hearing Board met on September 8 to continue the hearing for a zoning variance request from David Tshudy on behalf of Fritz Lee Dickerson, IV, Ashton C. Dickerson, Thomas Steele, Fritz Lee Dickerson, III, Ann M. Korb, Timothy S. Santoro, and Sherry L. Santoro. The applicants are requesting relief from Section 27-502 (permitted uses in the R-S District) to allow for commercial use and Section 27-508 (lot coverage regulations in the R-S District) to increase impervious area, of the Zoning Ordinance. The hearing was continued to September 28. At that time, the Township gave its testimony on the request for the revision. The hearing will again be continued on October 31. Solicitor Henninger reported that all testimony from residents should be completed that night, as well as closing arguments. The Zoning Hearing Board will most likely adjourn into executive session to discuss the request, and then issue a written decision within 45 days. He added that there is also an appeal period to the Court of Common Pleas.

Mr. Greene reported on an on-site meeting with representatives from K&W Engineering and SARRA at the North 29 lot property to discuss the proposed land development plan for Enterprise Inc. for construction of a new franchise facility. There may be variances requested with this plan. A meeting was also recently held with representatives from K&W Engineering and A.P. Williams for review and discussion of a proposed subdivision and land development plan for Soccer Shots, located at 1000 Eisenhower Blvd. (currently Greater Harrisburg Youth for Christ). There will most likely be zoning variance requests associated with this plan.

PUBLIC WORKS REPORT:

Mr. Wagner reported the Department has been quite busy. Recent jobs include crack sealing, street sweeping, aerating all the baseball fields, aerating and reseeding the waterline ditch at Greenfield Park, earth quaking the soccer fields, and fertilizing the baseball and soccer fields. The water issue at Wood and Dauphin Streets was addressed today with blacktop and the creation of a small berm. The landscaper did some work along the fence near the soccer fields and may need to do a bit more. There are two issues. The first is that the berm on the inside of the fence needs to be

a bit more pronounced in order to retain and guide more water. The second is that foot traffic is tearing up the area. The landscaper is going to talk to the landowner to see if the gate can be closed for a while until something can be established. Upcoming jobs include some minor road projects, re-aerating the soccer fields, some major renovations at the Woodridge baseball fields, and installation of manhole protection rings on manholes of concern in preparation of snowplowing, The Department will also be assisting the School District with use of the Township's boom mower, and will be gearing up for leaf collection season.

Mr. Wagner noted there have been issues with PPL street light reporting, and how the company processes the Township's work orders. The Township has received numerous calls about the light out at Hanover Street and Market Street. PPL is aware of this and has ordered replacement parts. It has indicated that the work should start during the week of the 17th.

Mr. Wagner referenced a draft of the Road Sign Inventory and Retro-Reflectivity Management Policy, which has been reviewed by HRG and Solicitor Henninger. This should be acted on by the Board in the near future. President Mehaffie asked that Mr. Williamson put this on the agenda of the legislative meeting for formal action.

The dumpster will be open for residents on November 5, from 8:00 A.M. to noon.

Commissioner Truntz referenced discussions about the collapsing manhole on Hamilton Drive and asked if there was progress made with repairing it. Mr. Williamson explained that Lester Lanman, Municipal Authority Manager, has forwarded the specs to HRG for review so that the work can be sent out for expedited bid. Commissioner Davies agreed that residents on the street are wondering about the status, and have concerns about access to their property. Mr. Wagner added that once more details and dates are known, the Township will meet with the homeowners to advise them.

Ms. Vajda suggested a lost and found bin be placed at the soccer fields, since she has found things like children's shoes that she is sure parents would appreciate recovering. President Mehaffie suggested it be put in the pavilion. Mr. Wagner agreed to look into this.

MANAGER'S REPORT:

A motion was made by Commissioner Truntz, seconded by Commissioner Springer, to approve Request for Funding #10 in the amount of \$3,261.02 from the Dauphin County

Infrastructure Bank for the Richardson Road Replacement project. The motion was unanimously approved.

Mr. Williamson reported that the Township was notified that it will be receiving \$52,808.91 back from FEMA through PEMA for winter storm Jonas.

ENGINEER'S REPORT:

Ms. Letavic updated the Board on the Greenways, Trails and Recreation Grant Execution for the Old Reliance and Shope Gardens Parks. A schedule was received today from the contractor on the playground installation and poured in place rubber. Ms. Letavic noted that it was not the schedule she was hoping for. There is basically an 8-week lead time until construction will happen for this project, which takes it into the first week of December. The contractor's concern is the poured in place rubber installation when the temperatures getting colder. They need three continuous nights of 40 – 45 degree weather in order for the rubber to cure properly. Ms. Letavic noted that the Township will likely still purchase the equipment now to keep things moving. It still makes sense to remove the existing playground equipment now for liability reasons, but the Township does need to advise the public.

An update was provided on the Richardson Road Bridge (funded by DCIB Loan and Gaming Grant). All easements for the project have been procured and recorded by the Solicitor as of September 28, 2016. A notice to proceed on full construction was issued that day. Actual anticipated construction will probably not begin until January, starting with the sewer line. Substantial completion is still due May 1, 2017.

The Dauphin County Infrastructure Bank (DCIB) Loan Application (2016) for the Highland Street and Summit Ridge Culverts was submitted on September 22. The loan application is for \$1.149 million dollars, for a 15-year term. Ms. Letavic explained that she does not believe closing on that loan will occur until late 2017 or 2018, since the County is still nailing down its financing. Therefore, Highland Street will continue to be closed for some time. The Summit Ridge Culvert is a maintenance item for the Public Works Department, but is not closed at this time.

HRG attended a Pollutant Reduction Plan development training with PA DEP on September 27. Lower Swatara will be required to submit to PA DEP a pollutant reduction plan for several tributaries. DEP continues to promote cooperation between municipalities, and neighboring municipalities, due to watershed boundaries crossing municipal lines, will also need to comply with

pollutant reduction planning efforts. HRG will look for opportunities to work together as it develops plans for many Dauphin County clients in 2017. There will be subsequent agreements needed to ensure that cooperative efforts comply with DEP standards.

Ms. Letavic reported that staff recently met to identify what revisions need to be made to correct the zoning map. It identified a number of inconsistencies and found eight areas that will need additional research and will require the expertise of a surveyor. Ms. Letavic reported that she had discussed the desire to correct the map with a surveyor, who will be putting together a budget so that the Board can see what it will take to do this.

Preliminary designs continue to be underway for the Capital Improvement Plan. Ways to resolve many of the concerns have been identified, including relocating stormwater drainage into the public right of way and out of the backyards of private residential property owners. To that end, due to the coordination that will be necessary with the property owners (construction, easements, etc.) and the new direction from regulatory agencies that permits will be necessary for construction, the Township's PENNVEST submission for the project will be delayed until the February 2017 submission – at the earliest – for PENNVEST Board consideration at its April 17, 2017 meeting. Ms. Letavic explained that the plan will be tweaked; the Township will basically stick with the same four projects but will update the schedule.

SOLICITORS REPORT:

Solicitor Henninger stated that on behalf of the Board, he would like to publicly thank the Mogel family which owns Brookside Mobile Home Park, Jonathan Byler of BBGY Inc., and Rick & Karen Scherba who own Elegant Marble, for donating the land necessary for the reconstruction of the Richardson Road Bridge and the sanitary sewer easements necessary for the sewer relocation. These are good business people who assisted the Township.

Notification was received today that the agreements pertinent to the Lumber Street sewer upgrade have been received, and that the Highspire Authority will be putting it out for bid soon. Developer Paul Navarro had asked that the Residential Retirement Community Plan be placed on the agenda tonight for conditional approval. Solicitor Henninger explained that since the staff had not had the opportunity to take a final look at the plans and because it had not been placed on the agenda for public awareness, he had advised Mr. Navarro to come to the October 19 legislative agenda to seek approval. Mr. Navarro has also been advised that he should be prepared to submit a

request for a time extension on the plan should the Board not grant the conditional approval that evening.

Solicitor Henninger reported that the draft zoning amendment to revise the Zoning Hearing Board from a three member board to a five member board had been reviewed and recommended for approval by the Township Planning Commission and the Dauphin County Planning Commission. The next step is to advertise the proposed amendment twice, and to schedule a Public Hearing. A motion was made by Vice President Wilt, seconded by Commissioner Truntz, to schedule a Public Hearing on the proposed zoning amendment for November 2 at 7:00 P.M.; the Board's workshop meeting will immediately follow. Solicitor Henninger added that the amendment will also be advertised for consideration that evening. The motion was unanimously approved.

An email was received from McNees Wallace & Nurick, representing Revcor, 3201 Fulling Mill Road, which will be submitting plans to resubdivide its property on Eisenhower Boulevard. Plans are to demolish the old motel, resubdivide the property and replace the motel with a new building pad. Because McNees Wallace & Nurick represented the Township as bond counsel during its recent refinancing and also did some work on the Township's employee handbook, rules of professional conduct require a waiver of conflict. Solicitor Henninger recommended the Board approve the waiver. A motion was made by Commissioner Truntz, seconded by Commissioner Davies, to approve the waiver of conflict. The motion was unanimously approved.

Solicitor Henninger explained that with the resignation of manager Anne Shambaugh, there is also a need to appoint a new Right to Know Officer. Before the Board tonight is a draft resolution, Resolution No. 2016-R-20, which appoints Frank E. Williamson, Jr. as Right to Know Officer for both the Township and the Police Department. A motion was made by Vice President Wilt, seconded by Commissioner Springer, to approve Resolution No. 2016-R-20. The motion was unanimously approved.

Solicitor Henninger reported that he had provided the Board with a draft of bidding documents and specifications for a new solid waste/recycling contract. He and Ms. Shambaugh had used the template from the last time the contract was bid, and also looked at the specifications of neighboring municipalities. The major change in this draft document is the option of using curb carts. While using the carts would not be required, it would be the preferred alternative. The document provides for a 96-gallon curb cart, but other smaller sizes will also be looked into. There is a Township resident who was formerly employed by a waste company that has volunteered to

look at these specifications. The cart would be supplied and owned by the contractor; a damaged cart would be replaced by the contractor. Solicitor Henninger added that if a resident does not wish to use the cart, the individual would contact the hauler to come pick it up. Commissioner Springer suggested that if a resident does not want to use the cart, it should not be delivered. Mr. Williamson explained that oftentimes the hauler feels it is easier to deliver them all as opposed to working off a list of which houses get them and which do not. Solicitor Henninger suggested this can be discussed at the mandatory pre-bid meeting. He noted that one item of question in the current contract is the collection period of 5 A.M. to 5 P.M. He noted that most municipalities have a start time of 6 A.M. or 6:30 A.M. In response to a question from President Mehaffie, Ms. Arroyo noted that the Township does not receive complaints about the early collection. President Mehaffie stated that if there are no complaints, he would suggest the hours stay the same. President Mehaffie asked if the pay-per-bag option is still included in this contract. Solicitor Henninger agreed that it is and stressed that the only change is to add the curb cart option as a preferred option. A motion was made by Commissioner Truntz, seconded by Commissioner Davies, to authorize advertisement of bids for the Lower Swatara Township Municipal Solid Waste Collection and Recyclables Collection and Marketing Services Contract, subject to final review and comment. The motion was unanimously approved.

President Mehaffie reported that he had several items which require formal action tonight.

A motion was made by Vice President Wilt, seconded by Commissioner Springer, to confirm the termination of Lisa Mundis as Director of Finance effective October 4, 2016. The motion was unanimously approved.

A motion was made by Vice President Wilt, seconded by Commissioner Truntz, to hire Zelenkoske Axelroad LLC as accounting and financial consultants. The motion was unanimously approved.

A motion was made by Vice President Wilt, seconded by Commissioner Davies, to hire Terry Kauffman of Aero Group for Municipal Management Consulting Services. The motion was unanimously approved.

FINAL COMMENTS:

President Mehaffie requested an executive session immediately upon conclusion of this meeting for personnel reasons.

Ms. Letavic thanked the Board for allowing Ms. Funk the opportunity to present Londonderry's MS4 program. She added that this ties in with the recent pledge the Township took to cooperate with the Manada Conservancy, which is also a partner of Londonderry Township. The Township will probably want to think about locations for an upcoming tree planting.

Commissioner Truntz thanked the residents who consistently come out to the meetings, and stated he appreciates their input.

Commissioner Springer and Vice President Wilt also thanked everyone for coming out.

Commissioner Davies agreed that it is good to hear the concerns of the residents, especially traffic concerns.

ADJOURN AND CONVENE INTO EXECUTIVE SESSION:

Hearing no other business, a motion was made by Vice President Wilt, seconded by Commissioner Truntz, to adjourn the meeting and convene into executive session. The motion was unanimously approved, and the meeting adjourned at 8:38 P.M.
